PROFESSIONAL SUMMARY

Data analyst with hands-on experience across operational data pipelines, compliance reporting, and end-to-end BI dashboard ownership. Currently the final compliance reviewer and certificate lead for a Victorian Energy Upgrades program processing 800+ service activities monthly — responsible for ensuring 100% compliance before VEU submission and managing VEEC/STC certificate creation, trading, and selling. Advanced SQL practitioner with demonstrated 7-9x query performance improvements on multi-million-row datasets. Delivers production Power BI and Tableau dashboards for directors and government stakeholders. Azure-certified (AZ-900, DP-900). Australian Citizen — available with one week notice.

TECHNICAL SKILLS

SQL & Database:

- SQL: PostgreSQL, MySQL, SQL Server, Azure SQL Database — CTEs, window functions, complex joins, performance tuning, large-scale datasets (4.7M+ rows).
- Performance Optimisation: Strategic indexing, query analysis, materialised views — 7-9x speedup achieved in production.
- ETL/ELT: Data pipeline development, validation, quality assurance, error handling.

Data Visualisation & BI:

- Microsoft Power BI: DAX measures, time intelligence (YTD, MoM), drill-through pages, KPI dashboards, executive reporting.
- Tableau: Interactive dashboards, data storytelling, trend analysis.
- Streamlit: Python-based dashboards with dynamic filtering and KPI tracking.

Data Analysis & Programming:

- Python: Pandas, NumPy, scikit-learn, Matplotlib, Seaborn — data manipulation, analysis, automation.
- R: dplyr, tidyr, ggplot2 — statistical computing, hypothesis testing, regression.
- Excel: Advanced formulas, pivot tables, VBA macros, large dataset manipulation.

Cloud & Tools:

- Microsoft Azure: AZ-900 & DP-900 certified; Data Factory, SQL Database, Storage.
- Tools: Git/GitHub, VS Code, Jupyter Notebook.

RELEVANT EXPERIENCE

IT Systems Specialist / Data Analyst

February 2026 – Present

Forge Solutions, Melbourne

- Perform final compliance review across all jobs before VEU program submission — last checkpoint in a team of 3+ compliance staff, ensuring 100% compliance before lodgement.
- Responsible for creating, trading, and selling VEEC and STC certificates following successful job submission, directly generating program revenue across 800+ monthly activities.
- Own and maintain Power BI dashboard tracking job compliance status and certificate pipeline, shared with company directors and government (Homes Victoria) stakeholders.
- Built Python automation tools reducing per-activity processing time from 45s to 15s (3x), batch-processing 3 compliance workflows per activity with 99% accuracy (validated via Excel QA template) — saving ~25 hours/month.

- Configured Dataforce audit workflows and optimised 20+ appointment questionnaires — improving compliance and admin team visibility into job progress and increasing efficiency of capturing required compliance evidence after job completion.
- Resolved a 1,000+ activity backlog through systematic audit workflows, data validation protocols, and staff training.

Operations Manager

Mar 2025 – Jul 2025

Green Home Green Planet, Melbourne

- Coordinated 100+ monthly service installations under the VEU program — scheduling, KPI tracking, compliance reporting, and quality standards across multiple contractor teams.
- Developed automated workflows reducing payment collection time from 7 days to 24 hours (85% improvement).

Note: Promoted from Data Analyst role below. Company ceased operations August 2025.

Data Analyst & Operations Officer

Dec 2024 – Feb 2025

Green Home Green Planet, Melbourne

- Analysed 2M+ row sensor datasets using Python (Pandas, NumPy), processing field service records and energy readings for commercial VEU compliance measurement and verification.
- Performed pre/post statistical analysis validating service outcomes through regression analysis and temperature normalisation.
- Built Excel-based tracking systems managing service status, warranties, scheduling, and demand forecasting across field teams.
- Implemented data validation protocols reducing data discrepancies by 20% across operational systems.
- Conducted data auditing and quality control across platforms, ensuring regulatory compliance and data integrity.

DATA SCIENCE PORTFOLIO PROJECT

Melbourne Energy Analytics

February 2026

Production SQL Analytics Platform & Operational BI Dashboards

- Designed star schema PostgreSQL database analysing 4.7M+ records (250K service installations, 4.5M energy readings) across Melbourne and regional Victoria.
- Wrote complex SQL with CTEs, window functions, and joins — achieving 7-9x performance improvement: contractor queries 847ms → 92ms, energy analysis 3,241ms → 412ms.
- Built Power BI dashboards with 15+ DAX measures: time intelligence (YTD, MoM), running totals, dynamic KPI categorisation, and drill-through pages.
- Implemented 16 automated quality checks across Python and SQL validation layers.
- Technologies: PostgreSQL, SQL, Python, Power BI, DAX, Streamlit.

EDUCATION

Master of Data Science (In Progress)

March 2026 – June 2028

La Trobe University, Melbourne | Specialisation: Big Data & Cloud Computing

- Part-time alongside full-time work. Coursework: Database Fundamentals, Machine Learning, Data Mining, Big Data Management on Cloud.

Graduate Certificate in Data Science

July 2024 – July 2025

RMIT University, Melbourne | GPA: 3.3/4.0

- Applied Analytics 82 HD | Data Visualisation 77 DI | R Statistical Computing 78 DI.
- Capstone: Identified 70% bias risk in A/B test, preventing \$2–5M wasted implementation.

CERTIFICATIONS

- AZ-900: Azure Fundamentals | DP-900: Azure Data Fundamentals | Microsoft | July 2025
- Google Advanced Data Analytics Professional Certificate | December 2024
- Machine Learning Specialisation – Stanford & DeepLearning.AI | December 2024

ADDITIONAL

- Australian Citizen | Eligible for Defence Security Clearance | Available with one week notice.
- Open to contract-to-permanent. Full-time availability alongside part-time Masters (evenings).
